Set a carbon budget (average CO2 per year per employee)

Favor climate-smart transport: a trip from Paris to Geneva by plane emits 57.5 kg of CO2 per passenger, compared with 1.3 kg by train

Invest in video-conferencing systems and favor local suppliers

Measure impact and track progress using carbon footprint analysis

Favor direct flights and avoid business class. A business class flight has a much higher CO2/km ratio than an economy class flight

In the field, choose vehicles that pollute less and provide staff with eco-driving training

Pool efforts with other organizations to reduce our environmental footprint (e.g. transport, freight)

Adopt environmental mobility policies and raise awareness within your organization

Protect the principle of « Do No Harm »

Respect the principle of « Do No Harm »

Contribute to efforts to limit the climate crisis

Preserve the ecosystems on which communities depend
